Abstracts

The global Car Parts Washer market size is expected to reach \$ 936 million by 2032, rising at a market growth of 8.7% CAGR during the forecast period (2026-2032). In 2024, global Car Parts Washer reached approximately 372,300 units, with an average global market price of around US\$ 1326 per unit. Gross margin is about 46%. The cost is 716 usd. Production Capacity is about 390,000-400,000 units. Car parts washers are specialised equipment used to clean car related parts, they guarantee the integrity and cleanliness of the parts. Upstream, Car Parts Washer primarily relies on suppliers of stainless steel and structural steel materials, pump and motor manufacturers, heating element and control system suppliers, filter and nozzle manufacturers, and cleaning fluid and chemical cleaning agent suppliers. These upstream links determine the equipment's corrosion resistance, cleaning efficiency, and operational stability. Midstream consists of automotive parts cleaning equipment manufacturers and system integrators, responsible for equipment design, manufacturing, assembly, and functional configuration (such as spray, ultrasonic, drum, or automated cleaning systems). Downstream mainly includes auto repair and maintenance shops, 4S stores, engine and transmission repair shops, automotive manufacturing and parts factories, remanufacturing companies, and industrial service outsourcing providers, using the equipment to clean engine parts, braking systems, transmission components, and precision automotive parts to meet the cleanliness requirements of assembly, repair, and remanufacturing.

In 2024, global passenger vehicle sales reached 74.3 million units, with a compound annual growth rate (CAGR) of 5.3% from 2021 to 2024. It is projected to reach 90.1 million units by 2030, with a CAGR of 3.3% from 2024 to 2030. Among these, global sales of new energy passenger vehicles increased from 6.2 million units in 2021 to 17.1 million units in 2024, representing a CAGR of 40.2%. Looking ahead, with the decline in the production of traditional gasoline-powered vehicles, new energy passenger vehicles

are expected to maintain high growth. The global new energy passenger vehicle market is projected to reach 42.3 million units by 2030, with a CAGR of 16.3% from 2024 to 2030.
