A retractable towbar is a towbar solution that can easily be folded out of sight if you are not using it.

A retractable towbar can be easily folded away under the bumper when it is not in use. Offering the same advantages as a detachable towbar, the simple precision rotation mechanism means that a retractable towbar takes seconds to hide away or prepare for use. This type of towbar can be wired into your vehicle's electrical system. A retractable towbar can tow trailers, caravans and boats and is also compatible with a majority of cycle carriers. With a swan-shaped neck, the tow ball doesn't need to be stored separately when folded away, as this too is concealed underneath the bumper.

According to our (Global Info Research) latest study, the global Car Retractable Towbar market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.
