The global Car Waterproof and Dustproof Cover market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The car waterproof and dustproof cover has the following characteristics: 1. High-density thickened material, which can effectively block dust from entering the car's internal space and the inside of the car machine. 2. The high-sensitivity reflective performance of silver gray can effectively block the irradiation and radiation of the sun's ultraviolet rays on the surface and interior of the car, and play a protective role. 3. It can protect the surface of the car from being scratched by external sharp objects. 4. The material is thickened with velvet, which will not cause friction loss to the car paint due to the movement of the dust cover. 5. Effectively resist the damage of strong ultraviolet rays to car paint and interior tires. 6. Using a car dust cover in summer can effectively prevent the temperature inside the car from being too high and prevent the interior from aging due to high temperatures. It will not feel like a sauna when people enter it.

The car waterproof and dustproof cover is a kind of equipment for the car to isolate rainwater and dust and protect the car body when it is not driving. The dustproof cover has the properties of rainproof, windproof and sandproof, anti-collision and scratch when parking, and super heat insulation. It prevents the vehicle from being exposed to the sun for a long time, the indoor temperature is too high, and the surface of the steering wheel, instrument, and seat cushion becomes hot. It has a significant cooling effect during use. , Slow down the aging of plastic parts such as leather and instruments in the car. Highly efficient waterproof anti-radiation material, flexible to retract without damaging the car body, easy to wash and dry.
