The automobile wiper linkage (front and rear) is a mechanical component of the windshield wiper system, which connects the wiper motor to the wiper arm. They are responsible for transmitting the rotary motion of the motor to the wiper arm, so as to make the wiper blade move back and forth on the windshield. The front wiper linkage is located at the bottom of the windshield and usually consists of two arms connected to the wiper motor. The arm is then connected to the wiper blade assembly that moves on the windshield. Some cars may also have a rear wiper linkage, which operates in a similar way, but is located at the rear of the vehicle.
