The global Carbomer market size is expected to reach \$ 1060 million by 2032, rising at a market growth of 5.6% CAGR during the forecast period (2026-2032).

A carbomer is a homopolymer of acrylic acid, which is cross-linked, or bonded, with any of several polyalcohol allyl ethers. Usually appearing as, a white powder, the compound is used as a thickener and emulsion stabilizer. Best known for its use in the cosmetic industry, it also has practical applications in medicine and hygiene. Many agencies consider the various types to be perfectly safe, although some of the substances used to neutralize their pH can be problematic.

Global key players of Carbomer include Lubrizol, Tinci Materials, SNF Floerger, etc. The top three players hold a share about 82%. North America is the largest market, and has a share about 40%, followed by Europe and China with share 31% and 23%, separately. In terms of product type, Carbomer 940 is the largest segment, accounting for a share of 68%. In terms of application, Personal Care and Cosmetics is the largest field with a share about 64 percent.

This report studies the global Carbomer production, demand, key manufacturers, and key regions.
