Abstracts

The global Carbon Capture Mineralization market size is expected to reach $ 836 million by 2032, rising at a market growth of 9.9% CAGR during the forecast period (2026-2032).

Carbon Capture Mineralization is a carbon management process that captures carbon dioxide from industrial exhaust gases, biogenic sources or the atmosphere and then reacts it with calcium- or magnesium-rich minerals, alkaline industrial wastes, concrete residues or other reactive materials to form stable inorganic carbonates. The process may be carried out in above-ground reactors, concrete production systems or underground reactive rock formations. Depending on the technical route, it can permanently store CO? while producing synthetic aggregates, carbonated concrete, supplementary cementitious materials, calcium carbonate, magnesium carbonate and other mineral products. Compared with utilization routes that convert CO? into fuels or short-lived chemicals, mineralization provides relatively durable carbon storage because the captured carbon is incorporated into stable solid minerals.

The Carbon Capture Mineralization market is an emerging segment of the carbon capture, utilization and storage industry, driven by decarbonization requirements in cement, concrete, steel, mining, waste management and other hard-to-abate sectors. Commercial development currently focuses on integrating CO? capture with concrete production, accelerated carbonation of steel slag and incineration residues, mineralized aggregate manufacturing, mine-tailings treatment and in-situ geological mineralization. The market is moving toward modular systems, direct treatment of low-concentration flue gas, greater use of industrial waste as mineral feedstock, standardized carbon-removal verification and larger commercial facilities. Its development is supported by the potential to combine permanent CO? storage with the production of saleable

construction materials and mineral chemicals. However, high capital costs, feedstock transportation, variable waste composition, reaction-rate limitations, energy and water requirements, product certification and the need to verify lifecycle carbon benefits remain important constraints on large-scale deployment.

Report Scope

This report studies the global Carbon Capture Mineralization demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Carbon Capture Mineralization, and provides market size (US$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Carbon Capture Mineralization that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Carbon Capture Mineralization total market, 2021-2032, (USD Million)

Global Carbon Capture Mineralization total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Carbon Capture Mineralization total market, key domestic companies, and share, (USD Million)

Global Carbon Capture Mineralization revenue by player, revenue and market share 2021-2026, (USD Million)

Global Carbon Capture Mineralization total market by Type, CAGR, 2021-2032, (USD Million)

Global Carbon Capture Mineralization total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Carbon Capture Mineralization market

based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include CarbonCure Technologies, O.C.O Technology, Carbon8 Systems, CarbonFree, Blue Planet Systems, CarbonBuilt, CarbiCrete, neustark, Carbon Upcycling Technologies, Fortera, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Carbon Capture Mineralization market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

Key Questions Answered

1. How big is the global Carbon Capture Mineralization market?
2. What is the demand of the global Carbon Capture Mineralization market?
3. What is the year over year growth of the global Carbon Capture Mineralization market?
4. What is the total value of the global Carbon Capture Mineralization market?
5. Who are the Major Players in the global Carbon Capture Mineralization market?
6. What are the growth factors driving the market demand?
