Abstracts

According to our (Global Info Research) latest study, the global Carbon Capture Transport Pipeline market size was valued at US$ 2557 million in 2025 and is forecast to a readjusted size of US$ 7291 million by 2032 with a CAGR of 16.4% during review period.

Carbon Capture Transport Pipeline refers to an onshore or offshore pipeline system within the carbon capture, utilization and storage value chain that continuously transports carbon dioxide captured from industrial production, oil and gas processing, power generation, low-carbon hydrogen and ammonia production, bioenergy, waste management or direct air capture facilities, following dehydration, purification, compression and pressurization, from the custody transfer point of a capture facility to a gathering hub, utilization facility or custody transfer point at a geological storage site. The system includes gathering pipelines, trunk pipelines, laterals and delivery pipelines, together with directly associated valves, fittings, compression and boosting facilities, metering equipment, pressure-relief and isolation devices, leak-detection systems and pipeline integrity management facilities. It may transport carbon dioxide in gaseous, dense or liquid phase and may be configured as a point-to-point pipeline, a shared cluster network or a regional trunk network.

Key Findings

North America remains the largest established market because of its extensive operating carbon dioxide pipeline network

+357 96 030922
info@marketpublishers.com

Engineering and construction services currently represent the largest revenue segment as new transport networks enter implementation

Shared cluster networks are replacing isolated point-to-point projects as the preferred model for new infrastructure

Oil and gas processing forms the established demand base while cement hydrogen and power drive new projects

European offshore storage networks and cross-border carbon dioxide infrastructure are creating the strongest emerging opportunities

Market Trends

Carbon Capture Transport Pipeline is transitioning from dedicated pipelines connecting a single source with an enhanced oil recovery site toward multi-user networks linking industrial clusters with permanent geological storage. New projects increasingly adopt shared gathering systems, oversized trunk pipelines, standardized connection specifications and open-access operating models, allowing additional emitters to connect after initial commissioning. Dense-phase transport remains the preferred configuration for high-capacity, long-distance pipelines, while gaseous-phase systems retain relevance for smaller gathering networks and liquid-phase solutions are being assessed for selected offshore and integrated transport chains. Technology development is concentrating on impurity management, fracture control, decompression modelling, corrosion resistance, leak detection, automated isolation and real-time integrity monitoring. Offshore projects are also creating demand for high-strength line pipe, flexible pipeline products and thermoplastic composite connections. Repurposing of existing hydrocarbon pipelines is gaining attention, but qualification is moving toward asset-specific assessment rather than general conversion assumptions. Commercially, the sector is evolving from equipment-oriented contracting toward integrated transportation services supported by long-term capacity reservations, regulated returns, take-or-pay arrangements and government-backed risk-sharing mechanisms.

Market Dynamics

Drivers

The principal market driver is the growing number of carbon capture projects moving

+357 96 030922
info@marketpublishers.com

from planning into construction and operation. The Global CCS Institute reported 77 operating projects and 47 projects under construction in 2025, expanding the requirement for gathering lines, regional trunk infrastructure and storage-site delivery pipelines. Policy support in the United States, European carbon-management regulation, national CCUS cluster programs and decarbonization commitments in China, Canada and the Middle East are improving project bankability. Demand is reinforced by cement, lime, steel, chemicals, refining and hydrogen production, where process emissions are difficult to eliminate through electrification alone. Shared transportation infrastructure reduces duplication and can lower unit transport costs by aggregating carbon dioxide from multiple sources, improving the economic case for both large anchor emitters and smaller industrial facilities.

Restraints

Market development is restrained by high initial capital requirements, long permitting periods and uncertainty over the timing and volume of connected carbon sources. A pipeline designed ahead of demand may operate below capacity during its early years, while undersized infrastructure can require expensive expansion after additional emitters connect. Project economics also depend on synchronized development across capture, transport and storage; delays at any part of the chain can postpone revenue for the entire system. Public concerns regarding pipeline routing and safety, fragmented regulatory treatment of carbon dioxide streams, unclear cross-border liability and limited long-term transportation tariff visibility can further delay final investment decisions. Smaller or geographically dispersed emitters may remain uneconomic where a shared gathering network is unavailable.

Opportunities

The largest opportunity lies in developing cluster and shared pipeline networks around ports, industrial corridors and geological storage basins. Europe is moving toward a unified market for carbon dioxide transport and storage services, creating opportunities for cross-border offshore networks in the North Sea and adjacent industrial regions. The European Union targets at least 50 million tonnes of annual carbon dioxide injection capacity by 2030, which requires corresponding collection and transportation capacity. Further opportunities arise from repurposing technically suitable natural gas pipelines, expanding established North American networks beyond enhanced oil recovery, connecting low-carbon hydrogen and ammonia projects, and developing carbon-removal infrastructure for bioenergy and direct air capture. Suppliers can also generate

+357 96 030922
info@marketpublishers.com

recurring revenue from inspection, digital monitoring, integrity management, compressor upgrades and network-capacity expansion.

Challenges

The primary technical challenge is maintaining safe and reliable transport under variable carbon dioxide composition, pressure, temperature and flow conditions. Water, oxygen, hydrogen sulfide, nitrogen and other impurities can affect phase behaviour, corrosion, compression requirements and fracture propagation, requiring clearly defined stream specifications across all connected emitters. Shared networks must also manage intermittent supply, pressure interactions and changing injection availability without disrupting upstream capture facilities. Repurposed pipelines require detailed assessment of materials, welds, fatigue history, pressure rating, valves and emergency isolation systems. Commercial challenges include allocating capacity among users, setting transparent tariffs, defining responsibility for off-specification carbon dioxide and coordinating network expansion with uncertain capture-project schedules. A shortage of harmonized cross-border standards and experienced engineering resources may become more visible as multiple regional networks proceed simultaneously.

Industry Chain Analysis

The upstream segment comprises steel plate, line-pipe steel, corrosion-resistant alloys, polymers, reinforcing fibres, valves, fittings, seals, compressors, pumps, metering instruments, sensors, control systems and leak-detection technologies. Midstream participants manufacture seamless and welded line pipe, flexible pipe and thermoplastic composite pipe; provide engineering, procurement, construction, offshore installation, testing and certification; and own or operate gathering networks and trunk pipelines. The value created at this stage depends on material qualification, pressure and phase design, route engineering, compression efficiency, system availability and long-term integrity performance. Downstream customers include oil and gas processors, power producers, hydrogen and ammonia developers, cement and steel groups, refiners, chemical companies, fertilizer producers and carbon-removal operators. Geological storage and utilization terminals establish receiving specifications and injection schedules that directly influence pipeline design and operation. Long-term value is shifting toward operators and service providers capable of coordinating multiple sources, managing capacity and delivering reliable custody transfer under multi-user contracts.

+357 96 030922
info@marketpublishers.com

Segment Insights

By business category, Engineering and Construction Services currently represents the largest segment because most emerging carbon dioxide networks remain in the design, construction or commissioning stage. Pipeline Products and Equipment covers steel line pipe, flexible and composite pipe, valves, compression equipment, metering, monitoring and directly associated components. Pipeline Transportation and Operation Services is expected to become increasingly important as shared networks enter commercial operation and generate recurring capacity, connection and throughput revenue. Others primarily covers inspection, certification, technical assurance, integrity management and specialized digital monitoring services.

By Pipeline Network Structure, Point-to-Point Pipeline remains important for projects with one anchor source and one clearly defined utilization or storage destination. Cluster and Shared Pipeline Network is becoming the principal development model for industrial regions because it aggregates multiple carbon sources and spreads infrastructure costs across users. Regional Trunk Pipeline Network represents the longer-term infrastructure layer, connecting several industrial clusters, collection hubs and storage basins through high-capacity corridors. By Project Development Type, New-Build Pipeline dominates current investment because most emerging storage hubs require dedicated carbon dioxide infrastructure. Repurposed Pipeline can reduce construction requirements where existing assets meet technical and routing conditions, while Pipeline Expansion and Upgrade will grow as operating networks add emitters, laterals, compressor capacity and new storage destinations.

Downstream Market Opportunities

Oil and Gas Processing remains the most established application, supported by concentrated carbon dioxide streams and existing transportation experience. Power Generation can provide high and relatively continuous throughput, making captured-power projects potential anchor users for regional networks. Low-Carbon Hydrogen and Ammonia Production offers another scalable source because reforming and gasification processes can generate concentrated carbon dioxide streams. Cement, Lime and Iron & Steel are strategically important because a substantial portion of their emissions is process-related and difficult to eliminate through fuel substitution alone. Refining, Chemicals and Fertilizers benefit from integration within industrial clusters where several capture units can share gathering and compression infrastructure. Others includes bioethanol, bioenergy with carbon capture and storage, waste-to-energy, direct

+357 96 030922
info@marketpublishers.com

air capture and additional industrial sources, creating opportunities for negative-emission transport services and smaller network connections.

Regional Insights

North America is the largest established regional market, led by the United States' extensive carbon dioxide pipeline experience and supplemented by Canadian trunk and storage projects. The region combines existing enhanced oil recovery infrastructure with an expanding pipeline of dedicated geological storage projects. Gulf Coast industrial concentration, suitable storage resources and policy incentives support new networks serving refining, chemicals, hydrogen, ammonia, power and direct air capture. However, permitting, route opposition and differences between federal and state regulation remain important project risks.

Europe is the most active emerging market for shared and cross-border transportation systems. North Sea storage resources are driving onshore gathering networks and offshore trunk pipelines in the Netherlands, Norway, the United Kingdom, Belgium, Denmark, France, Germany and Italy. China is developing carbon dioxide transportation around oilfields, coal-chemical facilities, power plants and industrial demonstration projects, with domestic steel-pipe and energy-equipment suppliers supporting localization. The Middle East is positioned for growth through natural gas processing, low-carbon hydrogen and ammonia and depleted-reservoir storage. Asia-Pacific development outside China is more selective, with projects concentrated in Australia, Japan, South Korea and Southeast Asian storage hubs.

Competitive Landscape Analysis

The competitive landscape is fragmented across pipeline operators, engineering contractors, equipment suppliers and line-pipe manufacturers rather than controlled by one type of company. ExxonMobil, Kinder Morgan, Enbridge, Gasunie and Fluxys compete primarily through network ownership, project development, capacity aggregation and transportation operation. Saipem and Technip Energies provide engineering and construction capabilities, while Baker Hughes, Linde, Air Products and NOV participate through compression, process integration, pipeline systems or broader carbon-management solutions. Tenaris, Vallourec, EUROPIPE, Welspun Corp, Corinth Pipeworks, Mannesmann Line Pipe, AMERICAN Steel Pipe and CNPC Bohai Equipment Manufacturing compete in qualified line pipe and associated products;

+357 96 030922
info@marketpublishers.com

Strohm addresses specialized offshore transport through thermoplastic composite pipe. DNV contributes technical assurance, qualification and integrity expertise. Future differentiation will depend on proven carbon dioxide service qualification, fracture and impurity management, offshore installation capability, network-operating experience and the ability to support projects from front-end design through long-term operation.

Report Scope

This report is a detailed and comprehensive analysis for global Carbon Capture Transport Pipeline market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Carbon Capture Transport Pipeline market size and forecasts, in consumption value ($ Million), 2021-2032

Global Carbon Capture Transport Pipeline market size and forecasts by region and country, in consumption value ($ Million), 2021-2032

Global Carbon Capture Transport Pipeline market size and forecasts, by Type and by Application, in consumption value ($ Million), 2021-2032

Global Carbon Capture Transport Pipeline market shares of main players, in revenue ($ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Carbon Capture Transport Pipeline

+357 96 030922
info@marketpublishers.com

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Carbon Capture Transport Pipeline market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include ExxonMobil, Kinder Morgan, Saipem, Baker Hughes, Linde, Tenaris, Air Products, Gasunie, Enbridge, Technip Energies, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Carbon Capture Transport Pipeline market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for Consumption Value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.

Pacific)

South America (Brazil, Rest of South America)

Middle East & Africa (Turkey, Saudi Arabia, UAE, Rest of Middle East & Africa)

Chapter Outline

Chapter 1, to describe Carbon Capture Transport Pipeline product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top players of Carbon Capture Transport Pipeline, with revenue, gross margin, and global market share of Carbon Capture Transport Pipeline from 2021 to 2026.

Chapter 3, the Carbon Capture Transport Pipeline competitive situation, revenue, and global market share of top players are analyzed emphatically by landscape contrast.

Chapter 4 and 5, to segment the market size by Type and by Application, with consumption value and growth rate by Type, by Application, from 2021 to 2032.

Chapter 6, 7, 8, 9, and 10, to break the market size data at the country level, with revenue and market share for key countries in the world, from 2021 to 2026.and Carbon Capture Transport Pipeline market forecast, by regions, by Type and by Application, with consumption value, from 2027 to 2032.

Chapter 11, market dynamics, drivers, restraints, trends, Porters Five Forces analysis.

Chapter 12, the key raw materials and key suppliers, and industry chain of Carbon Capture Transport Pipeline.

Chapter 13, to describe Carbon Capture Transport Pipeline research findings and conclusion.

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope
1.2 Market Estimation Caveats and Base Year
1.3 Classification of Carbon Capture Transport Pipeline by Type
  1.3.1 Overview: Global Carbon Capture Transport Pipeline Market Size by Type: 2021 Versus 2025 Versus 2032
  1.3.2 Global Carbon Capture Transport Pipeline Consumption Value Market Share by Type in 2025
  1.3.3 Pipeline Products and Equipment
  1.3.4 Engineering and Construction Services
  1.3.5 Pipeline Transportation and Operation Services
  1.3.6 Others
1.4 Classification of Carbon Capture Transport Pipeline by Pipeline Network Structure
  1.4.1 Overview: Global Carbon Capture Transport Pipeline Market Size by Pipeline Network Structure: 2021 Versus 2025 Versus 2032
  1.4.2 Global Carbon Capture Transport Pipeline Consumption Value Market Share by Pipeline Network Structure in 2025
  1.4.3 Point-to-Point Pipeline
  1.4.4 Cluster and Shared Pipeline Network
  1.4.5 Regional Trunk Pipeline Network
1.5 Classification of Carbon Capture Transport Pipeline by Project Development Type
  1.5.1 Overview: Global Carbon Capture Transport Pipeline Market Size by Project Development Type: 2021 Versus 2025 Versus 2032
  1.5.2 Global Carbon Capture Transport Pipeline Consumption Value Market Share by Project Development Type in 2025
  1.5.3 New-Build Pipeline
  1.5.4 Repurposed Pipeline
  1.5.5 Pipeline Expansion and Upgrade
1.6 Global Carbon Capture Transport Pipeline Market by Application
  1.6.1 Overview: Global Carbon Capture Transport Pipeline Market Size by Application: 2021 Versus 2025 Versus 2032
  1.6.2 Oil and Gas Processing
  1.6.3 Power Generation
  1.6.4 Low-Carbon Hydrogen and Ammonia Production
  1.6.5 Cement, Lime and Iron & Steel
  1.6.6 Refining, Chemicals and Fertilizers

+357 96 030922
info@marketpublishers.com

1.6.7 Others
1.7 Global Carbon Capture Transport Pipeline Market Size & Forecast
1.8 Global Carbon Capture Transport Pipeline Market Size and Forecast by Region
1.8.1 Global Carbon Capture Transport Pipeline Market Size by Region: 2021 VS 2025 VS 2032
1.8.2 Global Carbon Capture Transport Pipeline Market Size by Region, (2021-2032)
1.8.3 North America Carbon Capture Transport Pipeline Market Size and Prospect (2021-2032)
1.8.4 Europe Carbon Capture Transport Pipeline Market Size and Prospect (2021-2032)
1.8.5 Asia-Pacific Carbon Capture Transport Pipeline Market Size and Prospect (2021-2032)
1.8.6 South America Carbon Capture Transport Pipeline Market Size and Prospect (2021-2032)
1.8.7 Middle East & Africa Carbon Capture Transport Pipeline Market Size and Prospect (2021-2032)

2 COMPANY PROFILES

2.1 ExxonMobil
2.1.1 ExxonMobil Details
2.1.2 ExxonMobil Major Business
2.1.3 ExxonMobil Carbon Capture Transport Pipeline Product and Solutions
2.1.4 ExxonMobil Carbon Capture Transport Pipeline Revenue, Gross Margin and Market Share (2021-2026)
2.1.5 ExxonMobil Recent Developments and Future Plans
2.2 Kinder Morgan
2.2.1 Kinder Morgan Details
2.2.2 Kinder Morgan Major Business
2.2.3 Kinder Morgan Carbon Capture Transport Pipeline Product and Solutions
2.2.4 Kinder Morgan Carbon Capture Transport Pipeline Revenue, Gross Margin and Market Share (2021-2026)
2.2.5 Kinder Morgan Recent Developments and Future Plans
2.3 Saipem
2.3.1 Saipem Details
2.3.2 Saipem Major Business
2.3.3 Saipem Carbon Capture Transport Pipeline Product and Solutions
2.3.4 Saipem Carbon Capture Transport Pipeline Revenue, Gross Margin and Market Share (2021-2026)

2.3.5 Saipem Recent Developments and Future Plans
2.4 Baker Hughes
2.4.1 Baker Hughes Details
2.4.2 Baker Hughes Major Business
2.4.3 Baker Hughes Carbon Capture Transport Pipeline Product and Solutions
2.4.4 Baker Hughes Carbon Capture Transport Pipeline Revenue, Gross Margin and Market Share (2021-2026)
2.4.5 Baker Hughes Recent Developments and Future Plans
2.5 Linde
2.5.1 Linde Details
2.5.2 Linde Major Business
2.5.3 Linde Carbon Capture Transport Pipeline Product and Solutions
2.5.4 Linde Carbon Capture Transport Pipeline Revenue, Gross Margin and Market Share (2021-2026)
2.5.5 Linde Recent Developments and Future Plans
2.6 Tenaris
2.6.1 Tenaris Details
2.6.2 Tenaris Major Business
2.6.3 Tenaris Carbon Capture Transport Pipeline Product and Solutions
2.6.4 Tenaris Carbon Capture Transport Pipeline Revenue, Gross Margin and Market Share (2021-2026)
2.6.5 Tenaris Recent Developments and Future Plans
2.7 Air Products
2.7.1 Air Products Details
2.7.2 Air Products Major Business
2.7.3 Air Products Carbon Capture Transport Pipeline Product and Solutions
2.7.4 Air Products Carbon Capture Transport Pipeline Revenue, Gross Margin and Market Share (2021-2026)
2.7.5 Air Products Recent Developments and Future Plans
2.8 Gasunie
2.8.1 Gasunie Details
2.8.2 Gasunie Major Business
2.8.3 Gasunie Carbon Capture Transport Pipeline Product and Solutions
2.8.4 Gasunie Carbon Capture Transport Pipeline Revenue, Gross Margin and Market Share (2021-2026)
2.8.5 Gasunie Recent Developments and Future Plans
2.9 Enbridge
2.9.1 Enbridge Details
2.9.2 Enbridge Major Business

+357 96 030922
info@marketpublishers.com

2.9.3 Enbridge Carbon Capture Transport Pipeline Product and Solutions
2.9.4 Enbridge Carbon Capture Transport Pipeline Revenue, Gross Margin and Market Share (2021-2026)
2.9.5 Enbridge Recent Developments and Future Plans
2.10 Technip Energies
2.10.1 Technip Energies Details
2.10.2 Technip Energies Major Business
2.10.3 Technip Energies Carbon Capture Transport Pipeline Product and Solutions
2.10.4 Technip Energies Carbon Capture Transport Pipeline Revenue, Gross Margin and Market Share (2021-2026)
2.10.5 Technip Energies Recent Developments and Future Plans
2.11 NOV
2.11.1 NOV Details
2.11.2 NOV Major Business
2.11.3 NOV Carbon Capture Transport Pipeline Product and Solutions
2.11.4 NOV Carbon Capture Transport Pipeline Revenue, Gross Margin and Market Share (2021-2026)
2.11.5 NOV Recent Developments and Future Plans
2.12 Fluxys
2.12.1 Fluxys Details
2.12.2 Fluxys Major Business
2.12.3 Fluxys Carbon Capture Transport Pipeline Product and Solutions
2.12.4 Fluxys Carbon Capture Transport Pipeline Revenue, Gross Margin and Market Share (2021-2026)
2.12.5 Fluxys Recent Developments and Future Plans
2.13 Vallourec
2.13.1 Vallourec Details
2.13.2 Vallourec Major Business
2.13.3 Vallourec Carbon Capture Transport Pipeline Product and Solutions
2.13.4 Vallourec Carbon Capture Transport Pipeline Revenue, Gross Margin and Market Share (2021-2026)
2.13.5 Vallourec Recent Developments and Future Plans
2.14 EUROPIPE
2.14.1 EUROPIPE Details
2.14.2 EUROPIPE Major Business
2.14.3 EUROPIPE Carbon Capture Transport Pipeline Product and Solutions
2.14.4 EUROPIPE Carbon Capture Transport Pipeline Revenue, Gross Margin and Market Share (2021-2026)

info@marketpublishers.com

10.3.1 Middle East & Africa Carbon Capture Transport Pipeline Consumption Value by Country (2021-2032)
10.3.2 Turkey Carbon Capture Transport Pipeline Market Size and Forecast (2021-2032)
10.3.3 Saudi Arabia Carbon Capture Transport Pipeline Market Size and Forecast (2021-2032)
10.3.4 UAE Carbon Capture Transport Pipeline Market Size and Forecast (2021-2032)

11 MARKET DYNAMICS

11.1 Carbon Capture Transport Pipeline Market Drivers
11.2 Carbon Capture Transport Pipeline Market Restraints
11.3 Carbon Capture Transport Pipeline Trends Analysis
11.4 Porters Five Forces Analysis
11.4.1 Threat of New Entrants
11.4.2 Bargaining Power of Suppliers
11.4.3 Bargaining Power of Buyers
11.4.4 Threat of Substitutes
11.4.5 Competitive Rivalry

12 INDUSTRY CHAIN ANALYSIS

12.1 Carbon Capture Transport Pipeline Industry Chain
12.2 Carbon Capture Transport Pipeline Upstream Analysis
12.3 Carbon Capture Transport Pipeline Midstream Analysis
12.4 Carbon Capture Transport Pipeline Downstream Analysis

13 RESEARCH FINDINGS AND CONCLUSION

14 APPENDIX

14.1 Methodology
14.2 Research Process and Data Source
14.3 Disclaimer

I would like to order

Product name: Global Carbon Capture Transport Pipeline Market 2026 by Company, Regions, Type and Application, Forecast to 2032

Product link: https://marketpublishers.com/r/G650E6F02A7EEN.html

Price: US$ 3,480.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page https://marketpublishers.com/r/G650E6F02A7EEN.html
