The carbon fiber winding equipment is a special mechanical equipment used to manufacture carbon fiber reinforced plastic (CFRP) pipe fittings, containers and structural parts. Its working principle is to wrap prefabricated carbon fiber cloth or prepreg around a mold or axis, and heat and solidify it to shape it. Currently, Weihai Yafeida Machinery Technology's carbon fiber winding machine products are widely used in sports equipment, aerospace, automobiles, ships, industrial tooling, etc.

The carbon fiber winding equipment usually includes the following components: winding head, axial control system, longitudinal control system, rotation control system, heating and curing system, and control system. Carbon fiber winding equipment can produce high-strength, low-weight composite products and is widely used in various fields.
