## Abstracts

According to our (Global Info Research) latest study, the global Carbon Footprint Verification market size was valued at US\$ 1276 million in 2025 and is forecast to a readjusted size of US\$ 2327 million by 2032 with a CAGR of 8.8% during review period.

Carbon footprint verification is a method of assessing the amount and type of greenhouse gases produced by an individual or organization. It is based on measuring the amount of CO<sub>2</sub>, CH<sub>4</sub>, N<sub>2</sub>O and other greenhouse gas emissions that a person or organization has emitted over a period of time. Through carbon footprint verification, it can help individuals or organizations understand their greenhouse gas emissions, identify possible emission reduction measures, and also provide data support for policy formulation.

The carbon footprint verification market will continue to grow as activities such as global business, trade, transportation, and tourism increase. According to research findings, the scale of the carbon footprint verification market will grow at an average annual growth rate of more than 10% in the next few years. Governments of various countries have adopted a series of strict environmental protection policies, which encourage enterprises to adopt carbon emission reduction measures. For example, the European Union aims to achieve the goal of carbon neutrality by 2050 and promote the carbon emission market. Carbon footprint management service providers can use modern technology to monitor and record the carbon emissions of enterprises. With the development of technologies such as artificial intelligence, big data and blockchain, more tools and resources will be available to support the workflow of carbon footprint management. It uses carbon emissions data to manage company operations, but the trend could be extended to a wider range of areas in the future. For example, applying

carbon emission data in urban planning and architectural design to support the development of carbon-neutral cities and low-carbon buildings.
