Abstracts

The global Carbon Monoxide market size is expected to reach \$ 5793 million by 2029, rising at a market growth of 3.1% CAGR during the forecast period (2023-2029).

Global Carbon Monoxide key players include Linde, Air Liquide, Air Products, Wison Group, Wanhua, etc. Global top five manufacturers hold a share about 30%. Asia-Pacific is the largest market, with a share about 50%. In terms of product, Commercial Grade is the largest segment, with a share over 90%. And in terms of Application, the largest level is Chemical Industry, followed by Metal Industry and Electronic Industry, etc.

Carbon monoxide is a colorless, odorless, flammable, toxic gas. High-purity carbon monoxide that is dry and free of sulfur compounds is normally noncorrosive to metals at atmospheric pressure. Lower-purity grades containing moisture, sulfur compounds and other impurities can form toxic metal carbonyls and can cause stress corrosion cracking in carbon steels at elevated pressures. Chemically, carbon monoxide is stable but can act as a strong reducing agent at elevated temperatures.

In the report, the data is based on industrial production of carbon monoxide, without by-product.

This report studies the global Carbon Monoxide production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Carbon Monoxide, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year. This report explores demand trends and
