## Abstracts

According to our latest research, the global Carbon-Neutral Cement Production Technology market size will reach USD 13600 million in 2031, growing at a CAGR of 24.2% over the analysis period.

Carbon-neutral cement production technology refers to innovative processes and systems designed to manufacture cement with net-zero CO<sub>2</sub> emissions by eliminating, capturing, or offsetting greenhouse gas emissions throughout the production lifecycle. This is critical because traditional cement production accounts for ~8% of global CO<sub>2</sub> emissions, primarily from limestone calcination (chemical CO<sub>2</sub> release) and fossil fuel combustion.
