Carbon steel bar grating is a type of metal grating that is made from carbon steel. It consists of a series of parallel bars that are welded together at right angles to form a grid-like structure. The bars are typically made from low carbon steel and have a rectangular cross-section. Carbon steel bar grating is commonly used in industrial and commercial applications where durability and strength are important. It is strong and durable, yet lightweight, making it easy to install and transport. It is also resistant to corrosion and can withstand high temperatures, which makes it ideal for use in harsh environments.
