Abstracts

Carbon tetrachloride is a sweet smelling colorless liquid, also known by other names such as tetra chloromethane and carbon tet. Carbon tetrachloride is a vital chemical which was introduced by a French chemist in 1839 and has been an important inorganic chemical since. It is manufactured commercially as a by-product of chlorination of methane. It is synthesized during the manufacturing of other chloromethane products such as dichloromethane. Carbon tetra chloride molecules contains only one carbon atom which is surrounded by four chloride atoms. It is tetrahedral in shape and is highly symmetrical. Tetra chloromethane is a non polar compound similar to methane gas. Carbon tetrachloride is a very good solvent. Being a non polar compound, it readily dissolves other non polar compounds such as oil, fat and iodine. Scope of the Report:

This report focuses on the Carbon Tetrachloride in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The increasing demand for agrochemicals as one of the primary growth factors for this market. Carbon tetrachloride is extensively used as an agriculture fumigant and can also be used as mixtures with other fumigants as it has exceptional fire inhibiting properties and penetrating properties. The increase in the need for agricultural sustainability and the increasing yield due to the growing use of fertilizers and pesticides is predicted to drive the global carbon tetrachloride market during the forecast period. APAC is expected to be the major revenue contributor to the market throughout the forecast period. Rapid economic growth and rising population will drive the demand for carbon tetrachloride in this region. Moreover, countries such as China, India, Japan, and South Korea are also witnessing a substantial increase in the use of carbon tetrachloride for various applications such as chemical processing, solvents,

agrochemicals, and blowing agents.

The worldwide market for Carbon Tetrachloride is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
