Abstracts

According to our (Global Info Research) latest study, the global Carbon Textile Reinforced Concrete market size was valued at USD 23 million in 2023 and is forecast to a readjusted size of USD 28 million by 2030 with a CAGR of 3.2% during review period.

Carbon fibers are from the most recent & probability the most spectacular addition to the range of fiber available for commercial use. Carbon fiber comes under the very high modulus of elasticity and flexural strength. These are expansive. Their strength & stiffness characteristics have been found to be superior even to those of steel. But they are more vulnerable to damage than even glass fiber, and hence are generally treated with resign coating.

Carbon Textile Reinforced Concrete is one type of Textile Reinforced Concrete which is made by carbon fiber.

The manufacturers are concentrated in North America, Europe and Japan. Weserland is the largest manufacturer in the global market. The industry has a relatively low concentration.

Europe is the largest production region in the world, which occupied 31% share. The manufacture shares of North America, Japan and China were 23%, 17% and 6%.
