Carboxyethyl chitosan hydrophilic fiber dressing is a kind of medical dressing, which is made of natural cellulose materials such as carboxyethyl chitosan. This dressing has good hydrophilicity and permeability, which can absorb wound secretions and blood, promoting wound healing. At the same time, it can also form a soft protective layer to prevent external bacteria and pollutants from entering the wound, which helps prevent infection. Carboxyethyl chitosan hydrophilic fiber dressing also has good biocompatibility and biodegradability, which can effectively reduce irritation and damage to the human body and avoid secondary injury.
