## Abstracts

According to our (Global Info Research) latest study, the global Carboxylic Acid market size was valued at USD 13420 million in 2023 and is forecast to a readjusted size of USD 17470 million by 2030 with a CAGR of 3.8% during review period.

A carboxylic acid is an organic compound that contains a carboxyl group (C(=O)OH). The general formula of a carboxylic acid is R-COOH, with R referring to the rest of the (possibly quite large) molecule. Carboxylic acids occur widely and include the amino acids (which make up proteins) and acetic acid (which is part of vinegar and occurs in metabolism).

Increasing demand for cosmetics and personal care products will also catalyze the global carboxylic acid market demand. Extensive usage of stearic, butyric, and valeric acids in the manufacturing of these products will influence the global carboxylic acid market in the forecast period. Rising awareness among the people about cosmetics and beauty products, in addition to increasing disposable income, will propel the market size considerably in the upcoming years. Usage of the acids for esterification to provide the fragrance and for prevention of microbes, tend to have a prevailing effect on the market. More than 80% of these personal care products are for cosmetics, skin care products, fragrances, and hair care products.

The Global Info Research report includes an overview of the development of the Carboxylic Acid industry chain, the market status of Food & Beverages (Acetic, Valeric), Animal Feed (Acetic, Valeric), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Carboxylic Acid.
