According to our (Global Info Research) latest study, the global Carburetor market size was valued at USD 1146.9 million in 2023 and is forecast to a readjusted size of USD 1242.3 million by 2030 with a CAGR of 1.1% during review period.

Carburetor is the device inside an internal combustion engine that provides the area for air and gasoline to mix them together so that the engine runs properly. If there is not enough fuel mixed with the air, the engine 'runs lean' and either will not run or potentially damages the engine. If there is too much fuel mixed with the air, the engine 'runs rich' and either will not run (it floods), runs very smoky, runs poorly (bogs down, stalls easily), or at the very least wastes fuel.

The carburetor industry is a sunset industry for motorcycle & powersports. The top three players of global Carburetor include Keihin Group, Mikuni and Zama, with about 47% market shares.
