According to our (Global Info Research) latest study, the global Cardamom Oleoresin market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Cardamom oleoresin is a flavor extract obtained from the seeds of cardamom fruit, just before its ripening stage. The oleoresin is obtained through extraction with the help of a solvent. Cardamom oleoresin is a yellow colored liquid having a sweet & spicy fragrance. It is primarily used in food preparations as a food condiment, or as a spice which is added to enhance the flavor of a dish. It is also known to have medicinal properties and is listed in the British Herbal Pharmacopoeia, as a 'specific' for dyspepsia and flatulence.

On the backdrop of rising consumer awareness about the use of natural/ herbal products, the global Cardamom Oleoresin market is anticipated to grow at a substantial rate. The primary driver which is promoting the Cardamom Oleoresin market is that it is a natural and effective flavor enhancer, which is efficient and preferable for use, than its equivalent spice available in the market. Its warming fragrance and its natural properties for the treatment of heartburn, digestive system, cough, dyspepsia, etc. collectively adds to its market drivers, in turn resulting in natural fragrance and medicine. The Cardamom Oleoresin market is also seen to be flourishing on the backdrop of certain other uses in laxative, carminative and stomachic preparations, making it a good diuretic, stimulant, anti- spasmodic and anti- septic.
