## Abstracts

Cardiovascular diseases are leading cause of morbidity and mortality globally. Biomarkers are generally used as an indicator for particular diseases such as rheumatic and congenital heart diseases and cardiac arrhythmia. Cardiac biomarkers are measurable and quantifiable biological parameters. These are specifically used to check the presence or severity of cardiovascular diseases. Cardiac biomarkers are the substances that are released into blood when heart is damaged. These biomarkers are also used for diagnosing and monitoring diseases such as coronary syndrome or cardiac ischemia. The symptoms of these diseases includes chest pain, shortness of breath and nausea that ultimately leads to heart attack or angina. Cardiac biomarker tests helps to detect presence of coronary syndrome and cardiac ischemia to evaluate its severity and diagnosis.

### Scope of the Report:

This report focuses on the Cardiac Biomarkers in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The prevention of cardiac diseases by monitoring the heart conditions via cardiac biomarker testing is the profound approach for obtaining rapid results for immediate diagnosing and treatment. Cardiac biomarkers are protein-based traceable substances used as an indicator of biologic state and used for diagnostic and prognostic purposes associated with heart. Cardiac biomarkers are used as risk stratification for various cardiovascular diseases (CVDs), which include myocardial infarction, congestive heart failure, acute coronary syndrome (ACS) among others. The cardiac biomarkers that are widely used as an integrated diagnostic approach for CVDs include CK-MB, troponin I

and T, myoglobin, BNP, IMA and few others. Cardiac biomarkers market has witnessed a greater demand over the past five to six years.

There is a high demand for cardiac biomarkers due to their proficiency and the ability to provide accurate results. The number of clinical trials conducted for cardiac biomarkers is steadily increasing since manufacturers, universities, and research institutes are focused on improving the efficiency and efficacy of the biomarkers. Cardiac biomarker manufacturers are increasingly focusing on R&D to perform several clinical trials to prove the effectiveness of the products and increase their consumer base. According to our industry research and analysis, the increase in number of clinical trials will be one of the key trends that will gain traction in the cardiac biomarkers market during the next few years.

North America leads the global market, owing to the high demand for cardiac testing, high CVD prevalence rate and growing awareness towards cardiac diagnostics solutions. Asia-Pacific is growing at the fastest CAGR due to the modernization, increasing disposable incomes and rising affordability for the advanced cardiac treatments.

The worldwide market for Cardiac Biomarkers is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
