Abstracts

Cardiac monitoring generally refers to continuous or intermittent monitoring of heart activity, generally by electrocardiography, with assessment of the patient's condition relative to their cardiac rhythm. It is different from hemodynamic monitoring, which monitors the pressure and flow of blood within the cardiovascular system. The two may be performed simultaneously on critical heart patients. Cardiac monitoring with a small device worn by an ambulatory patient is known as ambulatory electrocardiography. Transmitting data from a monitor to a distant monitoring station is known as telemetry or biotelemetry.

Scope of the Report:

This report focuses on the Cardiac Monitoring in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Cardiovascular diseases have become one of the primary reasons for mortality and are becoming a major concern in most parts of the world. Coronary heart disease (CHD) is the most common type of heart disease, with a death toll of more than 370,000 people annually. The American Heart Association (AHA) reports cardiovascular disease to be the leading global cause of death, accounting for 17.3 million deaths per year, a number that is expected to grow to more than 23.6 million by 2030. The Heart Foundation also states that CVD is a major cause of death in Australia, with 45,053 deaths attributed to CVD in the country, in 2014. The other factors boosting the growth of the market studied are - technological advancements, patient awareness, and the increasing number of unmet medical needs in developing and underdeveloped countries. The Americas witness an increase in the prevalence of CVDs mainly due to the

unhealthy lifestyle of the residents. The international vendors such as GE Healthcare and Abbott operate in this region and offer technologically advanced products. US will be the major revenue contributor to the heart monitoring device market.

The worldwide market for Cardiac Monitoring is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
