## Abstracts

Cardiac rhythm management devices continue to evolve rapidly in form factor, reliability and lifespan. Even as implantable designs become increasingly compact and functional, they are introducing groundbreaking new elements like leadless pacing and integrated fixation concepts for minimally invasive deployment. Cardiac rhythm management devices such as pacemakers, implantable cardiac defibrillators (ICDs) and CRT devices are all getting smaller, smarter and longer-lasting.

### Scope of the Report:

This report focuses on the Cardiac Rhythm Management Devices in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Rise in cholesterol levels, hypertension, and excessive smoking lead to high risks of cardiac disorders, resulting in the growing need for cardiovascular therapeutic instruments such as CRT devices. Governments and organizations in many countries implement various initiatives to educate and help people to make medical decisions, increase public awareness, and improve the quality of life. Pacemakers, ICDs, and CRT devices are used to treat arrhythmias and are considered as a standard treatment option in many countries.

North America is expected to have the largest market share for cardiac rhythm management, due to developed healthcare infrastructure, government initiatives, rising number of death due to cardiovascular diseases, and rising incidence of arrhythmias demanding more cardiac implants. According to a report by the US CDC, more than 75,000 hospitalizations are attributed atrial fibrillation. Also, it highlighted that a large

part of the American population suffers from atrial fibrillation. Therefore, it is expected to rise further in the forecast period. Asia-Pacific is another region with high potential for this market, due to rising healthcare expenditure by government, increasing the prevalence of cardiac disorders, and growing per capita income of population in South Asian countries.

The worldwide market for Cardiac Rhythm Management Devices is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
