According to our (Global Info Research) latest study, the global Cardiovascular Implants market size was valued at USD 17880 million in 2023 and is forecast to a readjusted size of USD 23330 million by 2030 with a CAGR of 3.9% during review period.

Cardiac disease is a condition that involves narrowing or blockage of blood vessels. Cardiac disease is caused due to heart rhythm problems, smoking, high cholesterol, and high blood pressure. Coronary artery disease, myocardial infarction, peripheral arterial disease, atherosclerosis, and heart failure are some of the major cardiac diseases. The contraction or obstruction of blood vessels, especially coronary arteries, is one of the most common reasons for cardiac diseases. Cardiovascular implants are widely used for the treatment of cardiac diseases.

According to our research, the global market for medical devices is estimated at US\$ 603 billion in the year 2023, and will be growing at a CAGR of 5% during next six years.
