## Abstracts

Cardiac disease is a condition that involves narrowing or blockage of blood vessels. Cardiac disease is caused due to heart rhythm problems, smoking, high cholesterol, and high blood pressure. Coronary artery disease, myocardial infarction, peripheral arterial disease, atherosclerosis, and heart failure are some of the major cardiac diseases. The contraction or obstruction of blood vessels, especially coronary arteries, is one of the most common reasons for cardiac diseases. Cardiovascular implants are widely used for the treatment of cardiac diseases.

### Scope of the Report:

This report focuses on the Cardiovascular Implants in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The cardiac rhythm management devices segment is likely to expand at a rapid pace during the forecast period, due to increase in life expectancy and technological developments such as cardiac resynchronization therapy. Moreover, cardiac rhythm management devices are increasingly used for the management of arrhythmia and heart failure. In terms of end-user, the global market can be categorized into hospitals, ambulatory surgical centers, and research institutes. The hospitals segment is expected to expand at a high CAGR during the forecast period, as most patients prefer to visit hospitals for diagnosis and treatment. Moreover, larger number of cardiac implanted surgeries are conducted in hospitals. Prevalence of heart disorders and aging population are the major factors fueling the growth of the global cardiovascular implants market. Moreover, rise in awareness about these implants and established infrastructure are projected to drive the market during the forecast period. However,

high cost of devices and stringent approval process are anticipated to restrain the market in the next few years.

The worldwide market for Cardiovascular Implants is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
