## **Abstracts**

Cardiovascular diseases are the leading cause of death worldwide where in one in three people die each year due to heart disease. CVIS is more data driven as compared to CPAPS where patient informatics from integrated Hemodynamics systems, Echo machines, EKG/ECG carts and third-party integrated monitoring systems are all stored within the single CVIS database for patient records and reporting. CVIS has the ability to provide dynamic reporting i.e. images, informatics, measurements, etc. that are structured in a template-type format for efficiency and consistent delivery of patient reports.
