According to our (Global Info Research) latest study, the global Cardiovascular Information System (CVIS) market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Cardiovascular diseases are the leading cause of death worldwide where in one in three people die each year due to heart disease. CVIS is more data driven as compared to CPAPS where patient informatics from integrated Hemodynamics systems, Echo machines, EKG/ECG carts and third-party integrated monitoring systems are all stored within the single CVIS database for patient records and reporting. CVIS has the ability to provide dynamic reporting i.e. images, informatics, measurements, etc. that are structured in a template-type format for efficiency and consistent delivery of patient reports.

According to our research, the global market for medical devices is estimated at US\$ 603 billion in the year 2023, and will be growing at a CAGR of 5% during next six years. The global healthcare spending contributes to occupy 10% of the global GDP and is continuously rising in recent years due to the increasing health needs of the aging population, the growing prevalence of chronic and infectious diseases and the expansion of emerging markets. The medical devices market plays a significant role in the healthcare industry.
