The global Carnation market size is expected to reach \$ 3911 million by 2032, rising at a market growth of 3.1% CAGR during the forecast period (2026-2032).

Dianthus caryophyllus, carnation or clove pink, is a species of *Dianthus*. It is probably native to the Mediterranean region but its exact range is unknown due to extensive cultivation for the last 2,000 years.

It is a herbaceous perennial plant growing to 80 cm tall. The leaves are glaucous greyish green to blue-green, slender, up to 15 cm long. The flowers are produced singly or up to five together in a cyme; they are 3–5 cm diameter, and sweetly scented; the original natural flower colour is bright pinkish-purple, but cultivars of other colours, including red, white, yellow and green, have been developed.

Some fragrance-less carnation cultivars are often used as boutonnieres for men.

Global Carnation key players include Colombia, Kenya, China, Italy, etc. Global top four manufacturers hold a share over 30%.

South America is the largest market, with a share over 30%, followed by Africa, and Europe, both have a share over 40 percent.

In terms of product, Standard Carnation is the largest segment, with a share nearly 70%. And in terms of application, the largest application is Domestic Field, followed by Business Field.
