Abstracts

The global Carob Seed Protein Concentrate market size is expected to reach \$ 699 million by 2032, rising at a market growth of 6.2% CAGR during the forecast period (2026-2032).

Carob seed protein concentrate is a plant-based protein ingredient derived from carob seeds through defatting and protein concentration processes. It is primarily used in food and beverage formulations, nutritional products, and functional food applications as an alternative or complementary protein source. In 2025, the average global selling price of carob seed protein concentrate is approximately US\$6,200 per metric ton, with global sales volume reaching around 72 thousand metric tons. The industry typically maintains a gross margin range of 30%–45%, supported by specialty raw material sourcing, processing know-how, clean-label positioning, and growing demand for diversified plant protein solutions. The supply chain includes upstream carob cultivation and seed processing, midstream protein extraction and concentration, and downstream demand from food manufacturers, nutrition brands, and ingredient formulators.

This report studies the global Carob Seed Protein Concentrate production, demand, key manufacturers, and key regions.
