Abstracts

The global Carpet Steam Washing Equipment market size is expected to reach \$ 807.3 million by 2029, rising at a market growth of 4.2% CAGR during the forecast period (2023-2029).

Rising demand for devices that provide a protective layer to floors and enhance the overall appearance of a home or workplace is one of the key factors stimulating the carpet cleaning machines market. In addition, it is used in anti-slip and floor insulation, which is another important growth inducer. Apart from this, increasing availability of carpet cleaning machines through online and offline distribution channels and expanding e-commerce segment are positively impacting the global market. In addition, rising consumer awareness about cleaning carpets helps in preventing several diseases such as pneumoconiosis and silicosis is also driving the growth of the market. Apart from this, rising demand for technologically advanced carpet cleaning machines coupled with rising personal income levels are also expanding the global market. Furthermore, the introduction of truck-mounted models that offer enhanced vacuuming capabilities, faster cleaning speeds, high-pressure steam, and others is expected to drive the carpet cleaning machines market over the forecast period.

Carpet steam washing equipment is designed to remove deeply embedded dirt and stains in carpets. Using carpet extraction is probably the best deep-cleaning method you can use on your carpets. Because it combines hot water with chemicals, it cleans much more than just the surface of your carpet-it can remove dirt and debris that have sunk deep into your carpet.
