Abstracts

Casein is a type of protein which akin to other proteins helps build and repair tissues. Commonly found in mammalian milk, casein is often marketed as an alternative to another common dairy-based protein- whey protein. Sometimes referred to as ?the other protein?, casein is a rich source of long-lasting amino acids and is an easy-to-digest source of protein similar to whey. But casein is different from pea protein powder, whey protein, and even whole foods such as eggs and chicken breast.
