Abstracts

Cash counters are widely used by the BFSI sector to count the cash deposited in the bank by account holders or for making any kind of transactions. The machines are primarily used in places where huge money transactions are involved daily. ATM machines also have inbuilt cash counter systems to determine the amount of money or currency being deposited by customers.

Scope of the Report:

This report focuses on the Cash Counter in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. With the increasing number of bank branches in emerging countries, the market for cash counters is expected to have a positive outlook over the coming years. Retail banking channels like the brick-and-mortar branches have faced the impact of digitization in the BFSI sector in developed economies, but the scenario is strikingly different in emerging economies. Banks in emerging countries like India and China are opening new branches to target the population that does not have access to banks. This is expected to increase the demand for cash counters in the APAC region over the next four years.

The worldwide market for Cash Counter is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
