Abstracts

The global Cast Film market size is expected to reach \$ 12350 million by 2032, rising at a market growth of 3.1% CAGR during the forecast period (2026-2032).

Cast film is a type of thermoplastic film produced through the cast extrusion process, where molten polymer is extruded through a flat die onto a chill roll, then solidified and wound into rolls. Depending on polymer selection, cast film can be made from polyethylene (LDPE, LLDPE, mLLDPE) or polypropylene (CPP), and may include specialty blends for enhanced clarity, heat-sealability, or mechanical performance. The film is valued for uniform thickness, high transparency, smooth surface, and excellent gauge control, making it suitable for applications such as industrial stretch wraps, protective liners, bags for low-barrier use, sealant layers in multi-layer laminates, shrink wraps, and certain label applications. In 2024, global production of cast films exceeded 4,000 kt, with an average market price above USD 2,200 per ton, reflecting both the scale of production and sensitivity to polymer feedstock costs.

Upstream, the cast film industry relies on polymer resins, processing additives (anti-block agents, slip agents, heat-seal resins), masterbatches, and extrusion equipment. Raw material availability, polymer grade selection, and additive formulation directly affect production efficiency and film properties. Downstream, cast film converters serve two main customer segments. First, industrial and logistics users—such as pallet wrap, protective liners, and commodity bag manufacturers—prioritize mechanical performance, cost-effectiveness, and consistent machine-run behavior. Second, brand owners and flexible packaging converters in food & beverage, personal care, and pharmaceutical sectors purchase cast film as a sealant or clarity layer in pouches, laminates, or lidding films. These buyers typically emphasize food-grade compliance (FDA/EU), uniform seal strength, printability, low odor/migration, and recyclability. Procurement behavior often

includes multi-year supply agreements, supplier audits, technical qualification runs, and performance scorecards. Notable industry players include Profol Group, UFLEX, Manuli Stretch, Alpha Marathon, Panverta, Polibak, Mitsui Chemicals, and Takigawa Seisakusho, representing a mix of pure cast film producers and converters offering value-added services.

The cast film market is influenced by both industrial and consumer-driven demand. Industrial usage—stretch wraps, liners, and low-barrier bags—grows alongside e-commerce and logistics expansion. Consumer-facing applications, particularly in food packaging, require high-clarity, mono-material, recyclable solutions with low-migration and food-grade properties. Sustainability is increasingly important, driving development of PCR content films, recyclable laminates, and design-for-recycling materials. Market dynamics are also affected by polymer feedstock volatility, prompting converters to optimize coextrusion structures, improve line efficiency, and offer value-added services like printing and slitting to strengthen margins. Geographically, Asia and North America show strong growth, with Europe emphasizing regulatory compliance and recyclable packaging. For decision-makers, short-term priorities include securing qualified, food-grade suppliers with stable lead times, while long-term competitiveness hinges on technical expertise, recyclable laminate design, and integrated upstream supply strategies.

This report studies the global Cast Film production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Cast Film and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Cast Film that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Cast Film total production and demand, 2021-2032, (MT)

Global Cast Film total production value, 2021-2032, (USD Million)

Global Cast Film production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (MT), (based on production site)

Global Cast Film consumption by region & country, CAGR, 2021-2032 & (MT)

U.S. VS China: Cast Film domestic production, consumption, key domestic manufacturers and share

Global Cast Film production by manufacturer, production, price, value and market share

2021-2026, (USD Million) & (MT)

Global Cast Film production by Type, production, value, CAGR, 2021-2032, (USD Million) & (MT)

Global Cast Film production by Application, production, value, CAGR, 2021-2032, (USD Million) & (MT)

This report profiles key players in the global Cast Film market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Profol Group, UFLEX, Manuli Stretch, Alpha Marathon, Panverta, Polibak, Mitsui Chemicals, Takigawa Seisakusho, PT. Bhineka Tatamulya, Polinas, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Cast Film market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (MT) and average price (USD/MT) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

Key Questions Answered:

1. How big is the global Cast Film market?
2. What is the demand of the global Cast Film market?
3. What is the year over year growth of the global Cast Film market?
4. What is the production and production value of the global Cast Film market?
5. Who are the key producers in the global Cast Film market?
6. What are the growth factors driving the market demand?
