Abstracts

The global Cat Backpack Carrier for Travel market size is expected to reach \$ 522 million by 2032, rising at a market growth of 6.2% CAGR during the forecast period (2026-2032).

In 2025, global Cat Backpack Carrier for Travel production reached approximately 5,000 K units, with an average global market price of around 65.5 USD/unit.

A Cat Backpack Carrier for Travel is a specially designed, hands-free wearable backpack used to safely and comfortably transport cats during outdoor outings, public transportation, vet visits, air travel, and other travel scenarios; it typically includes breathable mesh panels, transparent or semi-transparent windows, padded shoulder straps, secure zippers, and interior safety leashes to reduce cat anxiety while allowing owners to move freely.

The average single-line production capacity of Cat Backpack Carrier for Travel is 200 K units, the average gross profit margin was 53.8%.

The industrial chain of cat backpack carriers includes upstream raw material suppliers that provide Oxford fabric, mesh cloth, PC transparent boards, zippers, buckles, sponge padding, and sewing threads; midstream manufacturers and OEM/ODM factories responsible for product design, cutting, sewing, assembly, quality inspection, and packaging; and downstream sales channels such as cross-border e-commerce platforms, offline pet stores, outdoor retailers, supermarkets, brand distributors, and online live-commerce platforms serving global individual pet owners and commercial buyers.

The cost structure is weighted as follows: raw materials account for approximately 50% of the total cost, including main fabrics, mesh, hardware, and linings; labor and production processing account for about 25%, covering cutting, sewing, and assembly; logistics and warehousing account for roughly 10%; packaging and labeling account for around 8%; and design, management, and other miscellaneous expenses account for about 7%, with raw materials and labor being the two most significant cost components.

Demand continues to grow due to the increasing number of indoor cat owners, rising pet consumption levels, and the trend of traveling with cats; business opportunities lie in developing airline-approved models, breathable and decompression designs, luxury and eco-friendly materials, smart versions with fans or cameras, and targeted sales through cross-border e-commerce, private brand customization, and scene-based products for outdoor hiking, urban travel, and long-distance transportation.

This report studies the global Cat Backpack Carrier for Travel production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Cat Backpack Carrier for Travel and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Cat Backpack Carrier for Travel that contribute to its increasing demand across many markets.

Highlights and key features of the study
