According to our (Global Info Research) latest study, the global Cat Grass-Based Hairball Control Tablets and Solid Supplements market size was valued at US\$ 60.19 million in 2025 and is forecast to a readjusted size of US\$ 105 million by 2032 with a CAGR of 8.1% during review period.

Cat grass-based hairball control tablets and solid supplements are solid-format feline wellness products designed for daily hairball passage, digestive support and indoor grass-chewing needs. Typical formulations use wheatgrass, barley grass, oat grass, rye grass, psyllium husk, plant-derived dietary fiber, brewer's yeast, prebiotics, probiotics, freeze-dried meat powder or fish oil, and are manufactured as compressed tablets, freeze-dried pellets, soft chews, granules or grass-rich treats. The category is positioned around plant fiber and cereal-grass nutrition, offering indoor cats, long-haired cats and shedding-season cats a convenient routine supplement for hairball management, gut motility support and natural grass-craving satisfaction.

Cat grass tablets are best understood as a niche, cross-category segment between feline functional treats, pet nutritional supplements and routine hairball-care products. The category does not have a globally unified statistical code or regulatory name. In China, the market is commonly described as 'cat grass tablets,' 'hairball tablets' or 'freeze-dried cat grass tablets,' while Western and Japanese markets more often use terms such as grass bits, cat grass treats, cat grass snacks and hairball support chews. The practical boundary of the category is not the exact wording on the label, but whether the product uses cat grass, wheatgrass, barley grass, psyllium or plant fiber as a core functional proposition and is sold in a solid format for cats. This makes the category narrower than the broader hairball-care market and different from fresh cat

grass kits, hairball pastes and hairball-formula dry food.

Demand is driven by indoor cat ownership, long-haired cat grooming needs, seasonal shedding, convenience-oriented feeding and pet owners' preference for natural fiber-based daily care. China is likely to remain the largest strict cat grass tablet market because e-commerce merchandising, compressed-tablet formats and OEM capacity are more developed. In North America and Europe, the same consumer need is often met by fresh cat grass, grow kits, soft chews or general hairball-support products, which limits the penetration of strict tablets but still supports adjacent solid grass-based products. The main substitution risks come from hairball paste, digestive probiotics, hairball dry food and fresh cat grass kits.

From a policy perspective, China, the United States and the European Union all regulate these products under pet feed, specialty pet food, or animal feed labeling and safety frameworks. Core regulatory requirements focus on ingredient compliance, non-misleading labeling, production quality control, and avoiding drug-like efficacy claims. AAFCO continues to update labeling rules for pet food and specialty pet food, while the EU animal feed framework emphasizes safety, traceability and high-standard production. China's Administrative Measures for Pet Feed also set requirements for production, inspection, labeling and import registration. This policy direction favors manufacturers with filing capabilities, quality testing systems, formulation R&D and stable supply chains, while low-cost white-label products and products with exaggerated functional claims will face higher compliance risks.

This report is a detailed and comprehensive analysis for global Cat Grass-Based Hairball Control Tablets and Solid Supplements market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Sale Channel. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Cat Grass-Based Hairball Control Tablets and Solid Supplements market size and forecasts, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2021-2032
