Global Cat Litter Odor Control Additives Market 2026 by Manufacturers, Regions, Type and Application, Forecast to 2032

https://marketpublishers.com/r/G8976A8EE0B4EN.html
Date: September 2026
Pages: 130
Price: US$ 3,480.00 (Single User License)
ID: G8976A8EE0B4EN

Abstracts

According to our (Global Info Research) latest study, the global Cat Litter Odor Control Additives market size was valued at US$ 144 million in 2025 and is forecast to a readjusted size of US$ 255 million by 2032 with a CAGR of 7.9% during review period.

Cat Litter Odor Control Additives are functional materials incorporated into cat litter formulations to adsorb, neutralize, decompose, inhibit, or otherwise control ammonia, sulfur-containing compounds, amines, and other malodorous substances generated during litter use. The market primarily covers zinc ricinoleate-based deodorizing agents, zeolite and activated carbon adsorbents, superabsorbent polymer deodorizing granules, biological deodorizing additives, catalytic inorganic deodorizing materials, and fragrance-delivery odor-control systems supplied in liquid concentrate, powder, granule, microcapsule, and other commercial forms. These additives are used in bentonite, tofu, cassava, silica gel, mixed, and other cat litter formulations, where their dosage can range from very low levels for fragrance, activated carbon, or high-efficiency chemical deodorants to several percent for functional granules and mineral adsorption systems. Product performance is primarily determined by odor-removal efficiency, ammonia adsorption or neutralization capability, compatibility with litter substrates, dosage efficiency, dust generation, moisture interaction, storage stability, and processing suitability. This study focuses on functional deodorizing additives incorporated into cat litter manufacturing formulations and their supply relationships with cat litter producers and formulation suppliers.

Key Findings

+357 96 030922
info@marketpublishers.com

Global Cat Litter Odor Control Additives sales volume reached approximately 71.8 thousand tons in 2025

Global sales volume is estimated at approximately 78.4 thousand tons in 2026

The weighted average selling price increased from about US$1.95 per kg in 2025 to US$2.00 per kg in 2026

Mineral adsorption materials contribute the largest physical volume, while chemical and biological additives generate substantially higher value per kilogram

China, North America and Europe form the principal manufacturing and technology supply bases for Cat Litter Odor Control Additives

Market Trends

The Cat Litter Odor Control Additives industry is shifting from simple fragrance masking toward multi-mechanism odor management combining adsorption, chemical neutralization, biological degradation, catalytic treatment and controlled fragrance release. Traditional zeolite and activated carbon remain important because of their cost efficiency and compatibility with large-volume mineral litter, while higher-value systems such as zinc ricinoleate, microbial formulations, catalytic inorganic materials and engineered deodorizing granules are becoming increasingly important in premium and differentiated litter formulations. Another clear development is the transition from generic raw materials to application-specific additives engineered around particular litter substrates. Commercial formulations increasingly distinguish between bentonite, tofu, cassava and mixed litter systems, with suppliers optimizing particle size, moisture response, dust characteristics and dosage according to substrate properties. Functional granules that combine odor control with moisture management, antibacterial performance or improved litter handling are also gaining importance, supporting a gradual increase in the value content of additives used per ton of premium cat litter.

Market Dynamics

Drivers

+357 96 030922
info@marketpublishers.com

Growth is supported by expanding global cat ownership, increasing litter consumption and higher consumer expectations for odor control, low dust and longer litter replacement cycles. The shift toward indoor pet ownership has made ammonia and fecal odor management an increasingly important product differentiation factor, encouraging cat litter manufacturers to move beyond the inherent odor-control properties of base materials. Product premiumization is another important driver, particularly in tofu, cassava and hybrid cat litter, where formulation suppliers can incorporate specialized deodorizing granules, biological systems or chemical odor neutralizers to improve performance. Development of OEM and private-label cat litter manufacturing in China and other Asian production centers also supports demand for standardized functional additives that can be integrated into multiple formulations and exported to international brands.

Restraints

The market is constrained by the wide performance and price gap among different additive technologies. Low-cost zeolite and other mineral adsorbents compete directly with considerably more expensive zinc ricinoleate, biological additives, catalytic materials and fragrance-delivery technologies, limiting the economically viable dosage of higher-value ingredients in mass-market litter. In addition, many mineral-based cat litters already possess inherent moisture and odor adsorption properties, reducing the necessity for external additives in basic formulations. Formulation compatibility is another limiting factor because additives may influence clumping strength, moisture absorption, dust generation, fragrance perception or microbial stability. Producers therefore need to balance deodorizing performance with the overall physical characteristics and manufacturing cost of the litter.

Opportunities

The strongest opportunities are emerging in high-performance plant-based and mixed cat litter formulations, where manufacturers increasingly rely on engineered odor-control packages rather than a single low-cost adsorbent. Tofu and cassava litter, hybrid bentonite formulations and premium low-dust products create opportunities for SAP deodorizing granules, targeted mineral blends, biological deodorizing systems and high-efficiency odor-neutralizing chemicals. Application-specific formulations also create room for suppliers to move from commodity ingredients toward customized compounds, granules and concentrated additives with higher unit value. China offers particular opportunities because its large cat litter manufacturing base combines export-oriented

+357 96 030922
info@marketpublishers.com

OEM capacity with rapid development of functional particles, inorganic deodorizing materials and specialty formulations, while North American and European specialty chemical companies remain well positioned in high-value odor-neutralization and fragrance technologies.

Challenges

A major challenge is the lack of standardized industry-wide performance metrics for cat litter deodorizing additives. Suppliers use different testing methods for ammonia, sulfur compounds, amines, odor intensity and antibacterial performance, making direct product comparison difficult. The industry is also highly fragmented by technology: bulk mineral suppliers, specialty chemical companies, biotechnology companies, fragrance houses and integrated cat litter manufacturers operate with very different cost structures and sales models. Another challenge is separating independent additive demand from vertically integrated consumption, because some large litter manufacturers formulate and consume odor-control materials internally rather than purchasing standardized external additives. Long-term competition will therefore depend not only on deodorizing efficiency but also on formulation compatibility, cost per ton of finished litter, reproducibility, regulatory compliance and the ability to support OEM customers with customized formulations.

Industry Chain Analysis

The upstream segment of the Cat Litter Odor Control Additives industry includes natural zeolite and activated carbon resources, castor-derived chemical intermediates used in zinc ricinoleate, superabsorbent polymers, microbial strains and enzymes, inorganic catalytic materials, fragrance ingredients, carriers and encapsulation materials. Raw-material economics vary substantially across technology routes. Mineral adsorbents are generally characterized by large-volume production and relatively low unit value, whereas specialty chemicals, microbial formulations, catalytic systems and encapsulated fragrance technologies generate significantly higher value per kilogram. Manufacturing activities in the midstream include mineral purification and granulation, chemical synthesis, microbial fermentation and stabilization, functional powder compounding, granulation, encapsulation and application-specific formulation development.

Downstream customers are primarily cat litter manufacturers, OEM and ODM

+357 96 030922
info@marketpublishers.com

producers, private-label suppliers and integrated pet product companies. Value creation increasingly occurs at the formulation stage, where suppliers adapt deodorizing technologies to different litter substrates and production processes. In mass-market mineral litter, cost-efficient adsorption materials remain important, while higher-margin value creation is concentrated in specialized chemical neutralizers, biological products, engineered functional granules and customized odor-control packages. Supplier competitiveness therefore depends on access to raw materials, manufacturing consistency, dosage efficiency, application support and the ability to demonstrate measurable performance within finished cat litter rather than only at the raw-material level.

Segment Insights

By product type, zeolite and other adsorption-based materials account for the largest physical-volume portion of Cat Litter Odor Control Additives because they can be used at relatively high dosage levels and are economically suitable for large-scale litter production. Activated carbon also remains an established adsorption technology, particularly where manufacturers require stronger capture of volatile odor compounds. In contrast, zinc ricinoleate, biological deodorizing additives and catalytic inorganic systems represent smaller tonnage but substantially higher unit value. These technologies are increasingly used where manufacturers require stronger odor neutralization, lower effective dosage or differentiated premium claims. Superabsorbent polymer deodorizing granules occupy a distinct position by combining moisture management with odor-control benefits and are particularly relevant to mixed and plant-based formulations.

By application, bentonite cat litter remains the largest underlying application base because mineral litter continues to account for the majority of global cat litter volume. However, tofu, cassava and mixed cat litter represent more attractive incremental opportunities for specialized additives. Commercial mixed formulations can contain several percent of functional SAP and zeolite granules, while plant-based litter manufacturers increasingly use targeted deodorizing agents to compensate for differences in moisture management and odor adsorption compared with conventional mineral litter. Silica gel litter also uses supplementary deodorizing and antibacterial systems in differentiated formulations, although its inherent adsorption capability limits additive intensity in many standard products.

+357 96 030922
info@marketpublishers.com

Downstream Market Opportunities

Downstream opportunities are increasingly concentrated in differentiated cat litter rather than basic commodity mineral litter. Premium bentonite products use odor-control additives to extend effective use time and improve ammonia management, while tofu and cassava formulations require solutions compatible with plant fibers, starch binders and low-dust processing. Mixed cat litter is particularly attractive because manufacturers can combine the clumping and cost advantages of mineral materials with plant-based characteristics and then use SAP, zeolite and other functional particles to improve moisture and odor performance. Private-label and OEM customers also create opportunities for standardized deodorizing modules that can be adjusted by dosage, granule size or fragrance profile, allowing manufacturers to develop multiple product tiers without fundamentally changing their core production processes.

Regional Insights

China is one of the most important global production centers for Cat Litter Odor Control Additives because of its extensive cat litter manufacturing base and growing domestic capabilities in functional granules, inorganic deodorizing powders, zinc ricinoleate and customized litter formulations. The concentration of bentonite processing and pet litter manufacturing in northern China, together with plant-based and mixed litter production elsewhere in the country, creates a broad downstream customer base for additive suppliers. China is also increasingly important as an OEM development center, where additives are incorporated into formulations supplied to international pet product brands.

North America remains an important market for mineral adsorption technologies, specialty odor-control chemicals and biological additives, supported by a large installed base of cat-owning households and established premium litter brands. Europe has particular strengths in specialty chemicals, zeolite, fragrance delivery and malodor-management technologies, with Germany, France, Switzerland and Central Europe forming important technology and raw-material supply centers. India is strategically relevant in the zinc ricinoleate value chain because of its connection to castor-derived chemistry. Japan and South Korea have sophisticated downstream cat litter markets but currently show a smaller independent upstream supplier base, while Southeast Asia is more significant as an OEM manufacturing and raw-material sourcing region than as a standalone center of specialized cat litter deodorizing additive technology.

+357 96 030922
info@marketpublishers.com

Competitive Landscape Analysis

The competitive landscape is fragmented and technology-driven rather than dominated by a single type of supplier. Evonik Industries, Bionetix International, Innovative Chemical Technologies, Imerys, Givaudan, Symrise, ZEOCEM, Nova Industries, Teague Mineral Products and Bear River Zeolite represent different positions across specialty chemicals, biological formulations, fragrance technologies and mineral adsorption materials. Chinese suppliers such as Chengdu Kemengda Bio-Tech, Guangxi Linkway New Materials, Hangzhou Tianyuan Pet Products, Hengjie Group, Anhui Maitebao Bioengineering and Qingdao Gilancy Pet Products have strengthened the market through zinc ricinoleate, inorganic deodorizing materials, functional granules and cat-litter-specific formulation solutions. Competition therefore occurs across several dimensions: mineral suppliers emphasize resource access and cost efficiency; specialty chemical companies compete on odor-neutralization efficiency and low dosage; biotechnology suppliers focus on biological degradation; fragrance companies emphasize malodor management and controlled delivery; and integrated Chinese suppliers increasingly compete through customized formulation, OEM responsiveness and manufacturing scale. The market remains sufficiently fragmented for regional specialists and application-focused suppliers to maintain defensible positions where they provide strong formulation compatibility and measurable odor-control performance.

Report Scope

This report is a detailed and comprehensive analysis for global Cat Litter Odor Control Additives market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Cat Litter Odor Control Additives market size and forecasts, in consumption value ($ Million), sales quantity (Tons), and average selling prices (US$/kg), 2021-2032

Global Cat Litter Odor Control Additives market size and forecasts by region and

+357 96 030922
info@marketpublishers.com

country, in consumption value ($ Million), sales quantity (Tons), and average selling prices (US$/kg), 2021-2032

Global Cat Litter Odor Control Additives market size and forecasts, by Type and by Application, in consumption value ($ Million), sales quantity (Tons), and average selling prices (US$/kg), 2021-2032

Global Cat Litter Odor Control Additives market shares of main players, shipments in revenue ($ Million), sales quantity (Tons), and ASP (US$/kg), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Cat Litter Odor Control Additives

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Cat Litter Odor Control Additives market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Evonik Industries AG, Bionetix International, Innovative Chemical Technologies, Inc., Imerys, Givaudan, Symrise AG, ZEOCEM, a.s., Nova Industries, Teague Mineral Products, Bear River Zeolite Co., etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Cat Litter Odor Control Additives market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by region, regional analysis covers

North America (United States, Canada, and Mexico)

Europe (Germany, France, United Kingdom, Russia, Italy, and Rest of Europe)

Asia-Pacific (China, Japan, Korea, India, Southeast Asia, and Australia)

South America (Brazil, Argentina, Colombia, and Rest of South America)

Middle East & Africa (Saudi Arabia, UAE, Egypt, South Africa, and Rest of Middle East & Africa)

Chapter Outline

Chapter 1, to describe Cat Litter Odor Control Additives product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top manufacturers of Cat Litter Odor Control Additives, with price, sales quantity, revenue, and global market share of Cat Litter Odor Control Additives from 2021 to 2026.

Chapter 3, the Cat Litter Odor Control Additives competitive situation, sales quantity, revenue, and global market share of top manufacturers are analyzed emphatically by landscape contrast.

Chapter 4, the Cat Litter Odor Control Additives breakdown data are shown at the regional level, to show the sales quantity, consumption value, and growth by regions, from 2021 to 2032.

+357 96 030922
info@marketpublishers.com

Chapter 5 and 6, to segment the sales by Type and by Application, with sales market share and growth rate by Type, by Application, from 2021 to 2032.

Chapter 7, 8, 9, 10 and 11, to break the sales data at the country level, with sales quantity, consumption value, and market share for key countries in the world, from 2021 to 2026.and Cat Litter Odor Control Additives market forecast, by regions, by Type, and by Application, with sales and revenue, from 2027 to 2032.

Chapter 12, market dynamics, drivers, restraints, trends, and Porters Five Forces analysis.

Chapter 13, the key raw materials and key suppliers, and industry chain of Cat Litter Odor Control Additives.

Chapter 14 and 15, to describe Cat Litter Odor Control Additives sales channel, distributors, customers, research findings and conclusion.

3 COMPETITIVE ENVIRONMENT: CAT LITTER ODOR CONTROL ADDITIVES BY MANUFACTURER

3.1 Global Cat Litter Odor Control Additives Sales Quantity by Manufacturer (2021-2026)
3.2 Global Cat Litter Odor Control Additives Revenue by Manufacturer (2021-2026)
3.3 Global Cat Litter Odor Control Additives Average Price by Manufacturer (2021-2026)
3.4 Market Share Analysis (2025)
3.4.1 Producer Shipments of Cat Litter Odor Control Additives by Manufacturer Revenue ($MM) and Market Share (%): 2025
3.4.2 Top 3 Cat Litter Odor Control Additives Manufacturer Market Share in 2025
3.4.3 Top 6 Cat Litter Odor Control Additives Manufacturer Market Share in 2025
3.5 Cat Litter Odor Control Additives Market: Overall Company Footprint Analysis
3.5.1 Cat Litter Odor Control Additives Market: Region Footprint
3.5.2 Cat Litter Odor Control Additives Market: Company Product Type Footprint
3.5.3 Cat Litter Odor Control Additives Market: Company Product Application Footprint
3.6 New Market Entrants and Barriers to Market Entry
3.7 Mergers, Acquisition, Agreements, and Collaborations

4 CONSUMPTION ANALYSIS BY REGION

4.1 Global Cat Litter Odor Control Additives Market Size by Region
4.1.1 Global Cat Litter Odor Control Additives Sales Quantity by Region (2021-2032)
4.1.2 Global Cat Litter Odor Control Additives Consumption Value by Region (2021-2032)
4.1.3 Global Cat Litter Odor Control Additives Average Price by Region (2021-2032)
4.2 North America Cat Litter Odor Control Additives Consumption Value (2021-2032)
4.3 Europe Cat Litter Odor Control Additives Consumption Value (2021-2032)
4.4 Asia-Pacific Cat Litter Odor Control Additives Consumption Value (2021-2032)
4.5 South America Cat Litter Odor Control Additives Consumption Value (2021-2032)
4.6 Middle East & Africa Cat Litter Odor Control Additives Consumption Value

5 MARKET SEGMENT BY TYPE

5.1 Global Cat Litter Odor Control Additives Sales Quantity by Type (2021-2032)
5.2 Global Cat Litter Odor Control Additives Consumption Value by Type (2021-2032)
5.3 Global Cat Litter Odor Control Additives Average Price by Type (2021-2032)

6 MARKET SEGMENT BY APPLICATION

6.1 Global Cat Litter Odor Control Additives Sales Quantity by Application (2021-2032)
6.2 Global Cat Litter Odor Control Additives Consumption Value by Application (2021-2032)
6.3 Global Cat Litter Odor Control Additives Average Price by Application (2021-2032)

7 NORTH AMERICA

7.1 North America Cat Litter Odor Control Additives Sales Quantity by Type (2021-2032)
7.2 North America Cat Litter Odor Control Additives Sales Quantity by Application (2021-2032)
7.3 North America Cat Litter Odor Control Additives Market Size by Country
  7.3.1 North America Cat Litter Odor Control Additives Sales Quantity by Country (2021-2032)
  7.3.2 North America Cat Litter Odor Control Additives Consumption Value by Country (2021-2032)
  7.3.3 United States Market Size and Forecast (2021-2032)
  7.3.4 Canada Market Size and Forecast (2021-2032)
  7.3.5 Mexico Market Size and Forecast (2021-2032)

8 EUROPE

8.1 Europe Cat Litter Odor Control Additives Sales Quantity by Type (2021-2032)
8.2 Europe Cat Litter Odor Control Additives Sales Quantity by Application (2021-2032)
8.3 Europe Cat Litter Odor Control Additives Market Size by Country
  8.3.1 Europe Cat Litter Odor Control Additives Sales Quantity by Country (2021-2032)
  8.3.2 Europe Cat Litter Odor Control Additives Consumption Value by Country (2021-2032)
  8.3.3 Germany Market Size and Forecast (2021-2032)

+357 96 030922
info@marketpublishers.com

8.3.4 France Market Size and Forecast (2021-2032)
8.3.5 United Kingdom Market Size and Forecast (2021-2032)
8.3.6 Russia Market Size and Forecast (2021-2032)
8.3.7 Italy Market Size and Forecast (2021-2032)

9 ASIA-PACIFIC

9.1 Asia-Pacific Cat Litter Odor Control Additives Sales Quantity by Type (2021-2032)
9.2 Asia-Pacific Cat Litter Odor Control Additives Sales Quantity by Application (2021-2032)
9.3 Asia-Pacific Cat Litter Odor Control Additives Market Size by Region
9.3.1 Asia-Pacific Cat Litter Odor Control Additives Sales Quantity by Region (2021-2032)
9.3.2 Asia-Pacific Cat Litter Odor Control Additives Consumption Value by Region (2021-2032)
9.3.3 China Market Size and Forecast (2021-2032)
9.3.4 Japan Market Size and Forecast (2021-2032)
9.3.5 South Korea Market Size and Forecast (2021-2032)
9.3.6 India Market Size and Forecast (2021-2032)
9.3.7 Southeast Asia Market Size and Forecast (2021-2032)
9.3.8 Australia Market Size and Forecast (2021-2032)

10 SOUTH AMERICA

10.1 South America Cat Litter Odor Control Additives Sales Quantity by Type (2021-2032)
10.2 South America Cat Litter Odor Control Additives Sales Quantity by Application (2021-2032)
10.3 South America Cat Litter Odor Control Additives Market Size by Country
10.3.1 South America Cat Litter Odor Control Additives Sales Quantity by Country (2021-2032)
10.3.2 South America Cat Litter Odor Control Additives Consumption Value by Country (2021-2032)
10.3.3 Brazil Market Size and Forecast (2021-2032)
10.3.4 Argentina Market Size and Forecast (2021-2032)

11 MIDDLE EAST & AFRICA

11.1 Middle East & Africa Cat Litter Odor Control Additives Sales Quantity by Type

+357 96 030922
info@marketpublishers.com

(2021-2032)
11.2 Middle East & Africa Cat Litter Odor Control Additives Sales Quantity by Application (2021-2032)
11.3 Middle East & Africa Cat Litter Odor Control Additives Market Size by Country
  11.3.1 Middle East & Africa Cat Litter Odor Control Additives Sales Quantity by Country (2021-2032)
  11.3.2 Middle East & Africa Cat Litter Odor Control Additives Consumption Value by Country (2021-2032)
  11.3.3 Turkey Market Size and Forecast (2021-2032)
  11.3.4 Egypt Market Size and Forecast (2021-2032)
  11.3.5 Saudi Arabia Market Size and Forecast (2021-2032)
  11.3.6 South Africa Market Size and Forecast (2021-2032)

12 MARKET DYNAMICS

12.1 Cat Litter Odor Control Additives Market Drivers
12.2 Cat Litter Odor Control Additives Market Restraints
12.3 Cat Litter Odor Control Additives Trends Analysis
12.4 Porters Five Forces Analysis
  12.4.1 Threat of New Entrants
  12.4.2 Bargaining Power of Suppliers
  12.4.3 Bargaining Power of Buyers
  12.4.4 Threat of Substitutes
  12.4.5 Competitive Rivalry

13 RAW MATERIAL AND INDUSTRY CHAIN

13.1 Raw Material of Cat Litter Odor Control Additives and Key Manufacturers
13.2 Manufacturing Costs Percentage of Cat Litter Odor Control Additives
13.3 Cat Litter Odor Control Additives Production Process
13.4 Industry Value Chain Analysis

14 SHIPMENTS BY DISTRIBUTION CHANNEL

14.1 Sales Channel
  14.1.1 Direct to End-User
  14.1.2 Distributors
14.2 Cat Litter Odor Control Additives Typical Distributors
14.3 Cat Litter Odor Control Additives Typical Customers
