Catalyst Metering System refers to specialized equipment used for accurate measurement, feeding, and controlled addition of catalysts during industrial chemical reactions and catalytic processes. The system ensures stable catalyst supply by integrating metering devices, feeding mechanisms, control units, sensors, and monitoring systems. Depending on catalyst characteristics and process requirements, Catalyst Metering Systems can handle powder, pellets, liquids, and slurry catalysts through technologies such as screw feeding, pneumatic conveying, injection dosing, and loss-in-weight control. These systems are widely used in petrochemical, refining, chemical production, polymer processing, environmental catalysis, and other industrial processes requiring precise catalyst addition.
