According to our (Global Info Research) latest study, the global Cataract Devices market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Cataract Surgery is the removal of the eye's clouded natural lens, and replacing it with an artificial lens that helps restore vision to the eye. Without removing the cataract surgically, most patients with cataracts suffered with the blurred vision, if not complete blindness. Surgically removing the cataract is the only way to restore vision and see the world clearly once again. The cataract operation is normally an outpatient procedure, and most patients are discharged immediately after the cataract surgery.

Increase in incidences of diseases such as diabetes, obesity, and hypertension. In addition, the growth in geriatric population also boosts the growth of the market as geriatric population is more prone to cataract ailments. However, dearth of skilled professionals restrain the growth of the market. Moreover, government and non-profit organizations introduce programs to reduce the burden of cataract-related diseases globally, which create lucrative opportunities for key market players.
