Abstracts

Catastrophe insurance is a kind of insurance that protects both commercial and residential sectors against natural disasters like floods and hurricanes, earthquakes, and man-made adversities such as terrorist attacks. Besides human fatalities, natural catastrophes also cause significant financial losses. This type of insurance is generally excluded from standard hazard insurance policies owing to its low-probability. Insurers adapt to uncertain catastrophic risks by increasing their insurance rates, which in turn leads to lower loss ratios post-catastrophic events. Catastrophic losses due to natural disasters are very problematic and complicated from an insurance standpoint. The firms with low levels of homeowners' premiums are most adversely affected by the catastrophes.

Scope of the Report:

This report studies the Catastrophe Insurance market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Catastrophe Insurance market by product type and applications/end industries.

This industry research report identifies the pricing and valuation strategies of catastrophe bonds to be one of the major factors that will have a positive impact on the growth of this market in the coming years. Since the insurance industry is cyclical, insurance providers have the need to formulate different strategies that bring in stable earnings to earn positive yields and generate cash flows. Catastrophe bonds help investors to earn good returns that are uncorrelated with the broader financial markets and also helps portfolio managers understand the attributes of pricing trends, and in turn, make informed decisions in allocating capital. Cat bonds or catastrophic bonds can

transfer insurance risk to the capital markets, and have evolved into valuable risk management and investment tools and also provide an alternative means to capitalize reinsurance transactions.

The Americas will be the major revenue contributor to the catastrophe insurance market throughout the forecast period will account for more than 65% of the total market shares by 2020.
