According to our (Global Info Research) latest study, the global Catch Clip market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

A catch clip, also known as a snap lock or tailstock, is a stainless steel clip that is attached to a catch clip-type sealed container and is also intended to lock the lid. The hook portion of the catch clip is hooked over the rim of the lid, and the lid is secured by lowering the lever to allow simple sealing. Since it is welded to the body of the container, there is no need to worry about losing the fixture during storage compared to a lever band.
