## **Abstracts**

Cardiac catheterization is a procedure used to diagnose and treat cardiovascular diseases (CVDs) and other related conditions. Catheterization laboratory or cath lab is an examination room equipped with diagnostic imaging equipment. Cath labs play an important role in the visualization of arteries of heart and heart chambers.

### Scope of the Report:

This report studies the Cath Lab Services market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Cath Lab Services market by product type and applications/end industries.

One driver in the market is rising incidence of cardiac diseases and growth of insurance providers. In the Americas, the US occupies the major market share due to the increasing incidence of CVDs. According to the CDC (2017), about 28.4 million people were diagnosed with heart diseases. About 18.6 million people visit physician offices. About 614,348 deaths were reported in the country due to cardiac diseases by CDC. According to the CDC (2015), about 610,000 deaths were caused because of CVDs in the US. Coronary heart disease was the most common cardiac disease, reporting about 375,000 deaths in the US annually. One challenge in the market is managing cath labs with multispecialties. Hybrid cath labs include the installation of various medical imaging equipment such as interventional X-ray systems, ECG devices, and other patient monitoring devices. There is a lack of qualified medical professionals in most cath labs. With the introduction of hybrid cath labs, the management of different imaging specialties is difficult. In the developing countries such as India, South Africa, and Mexico, there is a shortage of experts for handling medical specialties.

The Americas will be the major revenue contributor to the catheterization lab services market throughout the forecast period. The rise in CVD cases and the increasing number of cath labs, will drive the growth of the market in this region. Countries such as the US and Canada have high standards of healthcare and have a high demand for cath lab services.

The global Cath Lab Services market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Cath Lab Services.

Europe also play important roles in global market, with market size of xx million USD in 2017 and will be xx million USD in 2023, with a CAGR of xx%.
