Abstracts

According to our (Global Info Research) latest study, the global Cationic Styrene Butadiene Latex market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

Cationic styrene-butadiene latex products are mainly used for the production and processing of cationic emulsified modified asphalt. By modifying road petroleum asphalt with styrene-butadiene latex, the technical indicators such as softening point, low-temperature ductility, and viscosity toughness of the base asphalt can be significantly improved, and the road performance of the base asphalt can be improved. Adding a certain amount of styrene-butadiene latex to road petroleum asphalt can significantly improve the temperature sensing performance, high and low temperature road performance, crack resistance and aging resistance of the asphalt binder.
