The global Catnip Product market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The industry trend for catnip products shows a consistent upward trajectory. As pet owners increasingly prioritize their cats' mental and physical health, demand for stimulating and enriching products like catnip-infused toys and accessories is on the rise. Consumers seek natural and safe ways to engage their feline companions, leading to a surge in the development and availability of innovative catnip-based items. The market also witnesses a trend towards eco-friendly, sustainably sourced, and aesthetically appealing catnip products, aligning with broader consumer preferences for environmentally conscious and visually appealing pet care options.

Catnip products are items designed for feline enrichment and enjoyment, typically utilizing the herb *Nepeta cataria*, also known as catnip. Catnip, a member of the mint family, contains a compound called nepetalactone that triggers euphoric reactions in cats, attracting them to toys, sprays, and other products infused with it. These items serve to stimulate cats, encouraging play, exercise, and mental engagement. Catnip products come in various forms, such as plush toys, scratchers, and sprays, providing a diverse range of options to entertain and engage feline companions, enhancing their overall well-being and interaction with their environment.
