A CBD Atomization E-Cigarette is an electronic cigarette device that converts a liquid containing CBD (cannabidiol) into vapor through an atomizer. CBD is a compound extracted from the cannabis plant that is not psychoactive (does not produce a 'high') but is thought to have a variety of potential health benefits, such as pain relief, anxiety relief, and improved sleep. Vaping electronic cigarettes heat CBD liquid to evaporate it into vapor, which users can then inhale to get CBD.
