According to our (Global Info Research) latest study, the global CCTV Inspection Cameras market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Sewer Camera is a professional plumbing equipment that's specially designed to explore and inspect pipe interiors. And for it to serve its purpose, it's used in conjunction with other gadgets such as the monitor and the probe. The camera has an illumination feature that enables it to see inside the pipes regardless if it's pitch-black. It is hooked to a probe that is maneuvered inside the system with the use of a reel and a crank. This reel allows the plumbers to push control the direction of the camera without breaking a sweat. Now aside from the probe, the monitor also plays an important role. It displays whatever the camera captures for plumbers to spot any crack, hole or clog inside the sewer lines.
