According to our (Global Info Research) latest study, the global CDM Tester market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

CDM tester is a specialized instrument to assess electronic devices' susceptibility to electrostatic (ESD) events, ensuring the reliability and robustness of semiconductor devices in various applications. By subjecting devices to controlled discharges, the CDM tester measures and analyzes their response to ESD, aiding in the evaluation of tolerance and the design of protective measures to enhance resistance. CDM testing provides valuable insights into ESD performance, allowing manufacturers to optimize designs and ensure compliance with industry standards. Overall, the CDM tester is essential for evaluating ESD robustness and contributes to the development of reliable electronic products.
