CDMO Service for Peptide APIs refers to integrated outsourced services covering process development, analytical development, quality studies, technology transfer, scale-up, GMP manufacturing, and commercial supply for therapeutic peptide active pharmaceutical ingredients, with peptide drug substances and related intermediates, rather than finished dosage forms, as the main deliverables. The upstream supply chain mainly includes protected amino acids, specialty amino acids, resin supports, coupling reagents, cleavage and deprotection reagents, organic solvents, purification media, analytical consumables, and packaging materials, while the main downstream customers are innovative pharmaceutical companies, biotechnology firms, specialty generic drug developers, and drug manufacturers that further formulate peptide APIs into injectables, lyophilized products, or other dosage forms. Competitive strength in this segment is typically reflected in process development capability, impurity control, quality system maturity, scale-up efficiency, and reliability of commercial supply. The global gross margin of CDMO Service for Peptide APIs in 2025 is estimated at 25%-40%.
