## Abstracts

Cooking hoods, exhaust hoods, or range hoods are devices which contain a mechanical fan and are placed above the cooktop in the kitchen. They help to remove fumes, smoke, steam, combustion products, airborne grease, and heat from the air by clearing out the air and by filtration. Those kitchens that have a range not located against a wall or located on an island need to be paired with a ceiling-mounted cooking hood. For professional or larger cooktops, a ceiling-mounted cooking hood can handle the extra output.
