The ceiling supply units are a light loaded systems consisting of a rotatable spring arm with manual vertical height adjustment and an eccentrically aligned shelf module. The module can accommodate up to 4 terminal units for medical gases as well as a maximum of 4 power sockets and data connectors. The units are mounted on ceilings, thus freeing up space on the ground. No more cables on the floor, easier cleaning, as well as safer and improved use of equipment for the benefit of the personnel and of patients. The equipment can be conveniently and precisely positioned at any point, as the arms of supply units vary in length and are movable in all directions. Freely combined in single or duo configurations, the range fits any room size and offers an efficient space management.
