According to our (Global Info Research) latest study, the global Celecoxib API market size was valued at USD 58 million in 2023 and is forecast to a readjusted size of USD 79 million by 2030 with a CAGR of 4.7% during review period.

Celecoxib API refers to the active pharmaceutical ingredient (API) of the drug Celecoxib, which is a non-steroidal anti-inflammatory drug (NSAID) used to relieve pain, inflammation, and stiffness caused by conditions such as osteoarthritis, rheumatoid arthritis, and ankylosing spondylitis. The Celecoxib API is the chemical compound responsible for the therapeutic effects of the drug. It is a selective cyclooxygenase-2 (COX-2) inhibitor, which means it works by blocking the production of prostaglandins, which are chemicals produced by the body in response to injury or inflammation. By reducing the production of prostaglandins, Celecoxib can help relieve pain, reduce inflammation, and improve joint mobility. The Celecoxib API is typically manufactured by pharmaceutical companies in accordance with strict quality control standards to ensure its purity, potency, and safety. It is then used to produce finished dosage forms of Celecoxib, such as tablets or capsules, which are prescribed by healthcare professionals to treat various inflammatory conditions.

Global key players of celecoxib API include Pfizer, Jiangxi Synergy, ScinoPharm, Jiangsu Hengrui Medicine, Jiangsu Chiatai Qingjiang, etc. The top five players hold a share over 73%.
