## Abstracts

The global Celecoxib API market size is expected to reach \$ 79 million by 2029, rising at a market growth of 4.7% CAGR during the forecast period (2023-2029).

Global key players of celecoxib API include Pfizer, Jiangxi Synergy, ScinoPharm, Jiangsu Hengrui Medicine, Jiangsu Chiatai Qingjiang, etc. The top five players hold a share over 73%. Asia Pacific is the largest market, has a share about 43%, followed by North America and Europe, with share 28% and 25%, separately.

Celecoxib API refers to the active pharmaceutical ingredient (API) of the drug Celecoxib, which is a non-steroidal anti-inflammatory drug (NSAID) used to relieve pain, inflammation, and stiffness caused by conditions such as osteoarthritis, rheumatoid arthritis, and ankylosing spondylitis. The Celecoxib API is the chemical compound responsible for the therapeutic effects of the drug. It is a selective cyclooxygenase-2 (COX-2) inhibitor, which means it works by blocking the production of prostaglandins, which are chemicals produced by the body in response to injury or inflammation. By reducing the production of prostaglandins, Celecoxib can help relieve pain, reduce inflammation, and improve joint mobility. The Celecoxib API is typically manufactured by pharmaceutical companies in accordance with strict quality control standards to ensure its purity, potency, and safety. It is then used to produce finished dosage forms of Celecoxib, such as tablets or capsules, which are prescribed by healthcare professionals to treat various inflammatory conditions.

This report studies the global Celecoxib API production, demand, key manufacturers, and key regions.
