## Abstracts

According to our (Global Info Research) latest study, the global Cement Clinker and Cement market size was valued at US\$ 425086 million in 2025 and is forecast to a readjusted size of US\$ 599504 million by 2032 with a CAGR of 5.0% during review period.

### Aggregate

Also known as sand and gravel aggregate, this is a granular inert material used in concrete and mortar to provide structural support and fill volume. It accounts for 60%–80% of the volume of concrete, and its primary function is to enhance structural strength and stability while reducing cement consumption and the risk of shrinkage cracking.

### Cement

A powdered hydraulic cementitious material made primarily from limestone, clay, and gypsum through calcination and grinding. When mixed with water, it undergoes a hydration reaction and hardens, firmly binding aggregates such as sand and stone. It serves as the core binder in concrete.

### Development Trends

### Aggregate Industry

Mechanical sand will fully replace natural sand: its share will exceed 85%, with high-

quality mechanical sand becoming the mainstream.

**Large-scale use of recycled aggregates:** The utilization rate of construction waste will rise to over 30%, driven by policy subsidies and cost advantages.

**Increased industry concentration:** Small mines will be phased out, and the market share of leading companies will rise from 10% to over 30%.

**Green and Smart Mines:** Fully enclosed operations, zero dust and wastewater emissions, and unmanned operations will become standard.

**Vertical Integration of the Supply Chain:** Cement companies will expand downstream into aggregates and ready-mix concrete to reduce costs, improve efficiency, and enhance competitiveness.

## Cement Industry

**Low-Carbon Transition:** Decrease in clinker ratio, widespread adoption of alternative fuels and raw materials, and promotion of CCUS pilot projects.

**High-End Products:** Increased share of specialty cements (nuclear power, offshore engineering, low-temperature applications) to meet the needs of high-end infrastructure projects.

**Intelligent Operations:** “lights-out” factories, digital twins, and intelligent quality control systems are fully implemented.

**Capacity Consolidation:** Obsolete capacity is phased out, with the CR10 exceeding 60% and leading enterprises dominating the market.

**Cross-Industry Expansion:** Expansion into aggregates, ready-mix concrete, prefabricated construction, and environmental hazardous waste disposal.
